

Generation Partners (GP) Project Screening Form for Trade Allies

Must answer yes to all questions before submitting Participation Agreement to local power company.

	Yes	No	Comments
Is the system a commercially proven technology of one of the following types?			Must be Solar Electric, Wind, Lo-impact Hydro or Biomass.
Is the Participant a current customer with an existing billing meter at or near the Site?			Site is the location of the customer's physical property (the electric service address) as defined on the distributor's power billing account.
Is the total nameplate capacity of the system(s) above 0.50kW and no larger than 200kW for this Participant at this Site?			DC capacity, not AC
Is the Billing account name the same as the Participant?			GP credits flow to the billing meter account, so the Participant must be the name on this billing account. This applies to rental and leased properties, too
Does the Participant meet additional qualifications?			For residential Participant, is the residential building occupied? For non-residential Participant, is the primary business purpose at this address something other than the generation of electricity?
Interconnection application completed by customer			Interconnection application may vary by local power company.
